SOLUTIONS THAT SIMPLIFY

Gateway with Modbus RTU, LTE and LAN

AG-801-LTE is a Modbus LTE/LAN Gateway for industry M2M applications. Designed to use with PLC, meters, sensors, solar systems and for machine monitoring.

AG-801-LTE

- Read/writes data to/from devices
- LTE/GSM and Ethernet connectivity
- Opto-isolated Modbus RTU interface
- 2 digital inputs with SMS alert option
- Configuration by SMS, www or server
- Wide power supply range
- Modbus data archive
- GSM signal strength level indicator
- DIN rail mounting

APPLICATION
Industry 4.0, meters, solar energy etc.

INDUSTRY 4.0   SMART CITY   POWER   AGRICULTURE
