

## CCMS Gateway with Modbus, timer and I/O

AG-811 is a Modbus LTE/LAN Gateway with 3 NO/NC outputs and digital inputs. Designed to use as street light panel controller, with energy meters, solar systems and other remote control and monitoring systems.

**AG-811**

- 3 independent NO/NC outputs
- Read/writes data to/from devices
- LTE/GSM and Ethernet connectivity
- Opto-isolated Modbus RTU interface
- 2 digital inputs with SMS alert option
- Timer and astronomical timer
- Configuration by SMS, www or server
- Wide power supply range
- Modbus data archive
- DIN rail mounting

### APPLICATION

electrical and instrumentation panels etc.
