

Smart Light Controller (Pole Mount)

The ALC-P2 is mounted directly inside the lighting pole dual Light Controller with inbuilt power, voltage and other electricity parameter measurement. Dedicated to use in Atreyo Smart Street Light System.

ALC-P2

- ON/OFF and dimming of luminaires
- Control of two luminaires independently
- Electrical parameter measurement
- Long range RF communication
- 0-10V dimming system
- Inbuilt internal redundant schedule
- Encrypted communication
- High Voltage range
- Firmware update over air

APPLICATION

lightning infrastructure etc.
